ROTABELT

Technical features

Conveying distance	up to 40 ft
Belt width	14.17 in
Max. discharge rate	92 cu yds / h
Rotation	310°
Weight lbs	3,600-4,200 lbs
Steel structure	
Without stabilizer	

➔ Profitable equipment

- Attractive price
- Standard equipment with low maintenance costs
- Labor savings: only one driver is necessary to transport and place concrete
- Time savings: no stabilizers for quicker setup, faster and easier than wheelbarrowing or raking
- Can be mounted on new or existing trucks
- Wireless radio control
- Sliding system to avoid segregation and compatible with every kind of concrete plasticity

➔ Multiple applications

- Various applications (foundations, slabs, walls, columns...)
- Place different types of materials (sand, gravel, concrete...)

➔ Additional options

- High voltage power line detector **1**
- High pressure washer **2**
- Detachable system **3**
